

SOUTH FORK LODGE

LOCATION

Swan Valley, Idaho

LUXURY RETREAT IN THE HEART OF NATURE

The 8 identical A-frame houses of the South Fork Lodge made of KLH® - CLT combine timeless aesthetics with modern functionality. Its characteristic, steeply rising roof shape maximizes room height and light flooding, while large windows harmoniously integrate the surrounding nature.

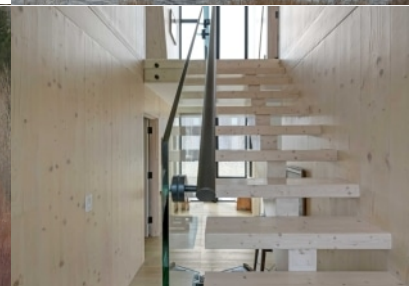

Each house has three bedrooms with high-quality furnishings bedrooms and two bathrooms, thoughtfully arranged for an optimal balance of community and privacy. The open-plan living structure with flowing transitions between the living, dining and outdoor areas

creates an inviting ambience for sociable get-togethers. A-frames offer an exclusive retreat with direct access to the amenities of the lodge – ideal for discerning guests and nature lovers.
